

## KHOA Board Meeting –June 28, 2006

In attendance: Steve Mascarella, Bob Straus, Rebecca Sellman, Colleen Huth, Alexis Schwartz

- Fountain is back and currently up and running.
  - Larry at Wolfe Creek Co. was able to help diagnose the problem – Steve has all documentation for future maintenance
- Three Civil Engineers are going to be consulted about the creek situation.
- We are hoping to have their evaluations in by next week
  - It may require growth control / reshaping (depth)
  - Bridge may also be the problem – possibly restricting water flow during heavy rains
- Dye will be put in pond to help with algae
- Life expectancy of bridge and sign – We checked with the Land Company and they are not sure about the life expectancy, nor do they know the contractors were installed them. Steve said he would look into this further.
- Web page design and maintenance was discussed – Steve knows someone in the development who has some knowledge about this. He will discuss it with them and fill us in at the next meeting.
- Next meeting scheduled for July 19 at Alexis's house.
